IDEA SPARKS

Every idea carries one living spark

It starts as a seed of light, swirls with the panel's colors while it's being formed, and catches fire once it's out in the world. The panel's colors only appear after the panel has actually spoken.

IDEA

The seed

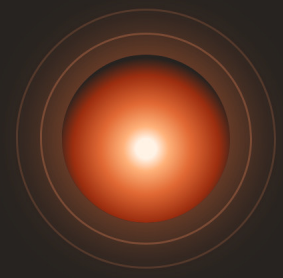

A single point of cool light in a dashed halo: caught, not yet looked at. It slowly pulses, like it's waiting.

FORMATION

The swirl

The five voices' colors flowing into one sphere, each weighted by its verdict. A bright seam runs through it when two of them split.

REALITY

The flame

A hot ember core sending out rings. Each logged conversation or payment adds a ring, so traction is something you can see.

ON THE CARDS

IDEA · NOT CHECKED
